---

Software Engineer and **Full-Stack Developer** with an intensive **22-week** program at **MERAKI Academy JO**. Experienced in architecting and deploying production-ready web applications through the mastery of **MERN** (MongoDB, Express, React, Node) and **PERN** (PostgreSQL, Express, React, Node) stacks. Successfully engineered multiple full-stack projects, translating business requirements into technical solutions. Committed to professional excellence within Agile-Scrum environments, I leverage modern Git workflows to deliver high-quality, maintainable code.

SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript.
- **Libraries & Frameworks:** React, Redux, Tailwind, Node.js, Express.js, Next.js, Socket.io, JWT.
- **Databases & Tools:** PostgreSQL, MongoDB, RESTful APIs, Git, GitHub.
- **Languages:** Arabic (Native), English (Proficient).

EXPERIENCE

Software Developer, XYZ Tech, Amman, Jordan | Jan 2025 - Dec 2025

- **Optimized Application Reliability:** Resolved 50+ critical software bugs and support tickets by refactoring legacy code, resulting in a measurable increase in stability for a 1,000+ user base.
- **Feature Engineering:** Architected and deployed modular features for internal tools using Node.js, collaborating with senior engineering staff to deliver two major production releases on schedule.

PROJECTS

HealthFlow - Patient Management & Clinical Dashboard

- Engineered a secure, HIPAA-compliant RESTful API using Node.js and Express to manage encrypted patient records, utilizing bcrypt and JWT for robust session management.
- Architected a responsive frontend with React and Tailwind CSS, featuring a real-time clinical dashboard for bed occupancy tracking via Socket.io and Recharts.

SwiftShop - E-Commerce & Inventory Management System

- Engineered a scalable RESTful API using **Node.js** and **Express.js** to handle complex product schemas, user authentication (JWT/bcrypt), ensuring secure data persistence and user privacy.
- Architected a responsive e-commerce interface with **Next.js**, leveraging **Socket.io** and **Chart.js** to provide admins with live sales telemetry. Utilized **Redux Toolkit** to ensure seamless data synchronization across multiple dashboard components.

NOTE: Each project must include three links: **GitHub Repo**, a **Video Walkthrough**, **Live Deployed Application**.

EDUCATION

Software Engineering Bootcamp, **MERAKI Academy JO**, Apr 2026

- **Immersive Program:** Completed an intensive **22**-week program focused on end-to-end software delivery, totaling **400**+ hours of hands-on development and problem-solving.
- **Full-Stack Development**: Engineered end-to-end applications using **MERN** and **PERN** stacks, from database design (PostgreSQL/MongoDB) to responsive UI deployment (React), demonstrating technical agility across diverse JavaScript environments (Node.js, Express.js).
- **Professional Workflow**: Collaborated within an Agile-Scrum framework, utilizing Git-based version control that simulates professional engineering sprints.

B.S. in Software Engineering, University of Jordan (UJ), Sep 2024
